Your handling of this case is horrible. You've won the case and because you're too lazy to finish the race, history's worst monopoly is going to walk with the weakest slap on the wrist you think you can get away with. Look at the damage they've done to the industry, legitimate smaller businesses, the software they've coerced/stolen, and make a firm stand! They should have been split up into 3 parts, \*NOT\* just two. And, you cowards have already backtracked out of that decision.

Grow a pair or go home.
